PROFILE

I'm Lead Product Manager at Coolblue, responsible for the commercial results and the online customer journey of two product categories in the Netherlands, Belgium and Germany. I make decisions based on customer insight and data, and bring the interests of commercial, marketing, purchasing and development together along the way. What I'm good at: prioritising, making agreements with stakeholders, and bringing structure when a lot of things depend on each other. Alongside that I ship my own iOS apps, where I set the product direction and make the decisions.

EXPERIENCE

Aug 2022 – present

Lead Product Manager

Coolblue · Gaming, Printers & Office

Responsible for the commercial results and the online customer journey of the Gaming, Printers & Office category in the Netherlands, Belgium and Germany. I directly lead nine people and coach them on their work and development.

- Setting and rolling out vision and roadmaps across several category teams, broken down into quarterly milestones.
- Turning strategy into project plans, prioritised on customer and business value.
- Leading multidisciplinary project teams: alignment, progress and prioritisation.
- Making agreements with stakeholders such as purchasing, marketing and development on results and progress.
- Getting new features onto the roadmaps of development teams in other domains.

Apr 2026 – present

Own apps

Outside work · iOS, App Store

AI writes the code; I decide the problem, the scope, the priorities and what goes live.

- **BabyBeam.** Video baby monitor using two iPhones, no account. Live since July 2026.
- **WristVault.** Watch collection tracker, one-time purchase. Live since July 2026.
- **GRID_BREAKER.** Reflex game without ads. Live since June 2026.

Working notes such as the backlog and a story with an acceptance criterion are on jimmyrentmeester.github.io.

LANGUAGES

Dutch, English

2020 – 2022	Product Manager, Gaming Coolblue End-to-end owner of the commercial performance and customer journey of the Gaming category. For the PlayStation 5 launch in 2020 (little stock, enormous demand) I worked with development, the app team, marketing, customer service and logistics at the same time. Afterwards I set up a fixed process for every new batch of stock, which meant less customer contact. • Improving growth and customer journeys using behavioural, returns and review data. • Coaching fellow product managers on data, experimentation and the craft.
2019 – 2020	SEO Specialist BigSpark B.V. · Nijmegen Technical and editorial SEO to grow organic traffic, based on data analysis.
2018 – 2019	Online Marketeer, SEO & CRO Coolblue Customer journey for Gaming & IT accessories. Improved landing pages and navigation based on customer behaviour.
2017 – 2018	Product Support Specialist Coolblue Analysing NPS, return reasons and customer feedback to drive product improvements.
2016 – 2017	Product Editor Coolblue Content for Virtual Reality and Tablets, and improvements within the content team.
2014 – 2016	Software Research & Concept Development U-Approach · Eindhoven Concepts around Bluetooth beacons for clients including GLOW and VisitBrabant, working with design and IT. Research into how people use mobile apps and what shifts that behaviour.
